Pre-4: Finding resonance: Building an IAVCEI Commission on Indigenous People and Volcanology

English / Participants: 10 – 20 / Cost: 10 US\$

This workshop seeks to identify and connect people who value and are invested in Indigenous people, Indigenous knowledge, and volcanology. Workshop goals center on relationship-building and sharing knowledge, visions, and science. With enough community support, especially from Indigenous volcanologists, we hope to create an IAVCEI Commission on Indigenous People and Volcanology, intended to provide an ongoing forum and resource for Indigeneity and volcanology across international groups.
